

ANNOUNCEMENT

GeoExchange BC is pleased to announce that an in-kind memorandum of understanding has been signed with Magnum Project Management (MPM) for the provision of services required to maintain and expand the BC case study inventory of geoexchange installations. This inventory is an important industry monitor and provides consumers and members with a general overview of the diversity and growth of this industry in BC. This arrangement with MPM was signed effective September 12, 2005 for a term of one year.

GeoExchange BC wishes to thank MPM for their gracious contribution to the success of our association and that of the geoexchange industry in BC.
